ABOUT KAPELOU

Stability

As a financially independent business, KAPELOU strives for long-term partnerships. You can be sure that our team of experts will be there today, tomorrow and in the future.

Efficiency

KAPELOU solutions are scalable and able to grow along with your business. You can always carry out modernization or retrofiting.

Quality

As an original equipment manufacturer and system integrator, KAPELOU offers individual and high-quality solutions from a single source, specially designed to solve your tasks.

Reliability

With timely service and customer support, KAPELOU ensures the smooth operation of your system both during and after installation.

Know-how

KAPELOU solutions always meet the latest technological standards and can be easily integrated into the existing (IT) system.

Production
21,000 m²

200 + employees

KAPELOU was **founded in 2013** for the assembly of racking systems

In 2017, KAPELOU diversified the services by offering the integration of automation systems in intralogistics

In 2018, KAPELOU production was launched

600+ projects have been implemented

KAPELOU employes **>200 people**

In 2022, KAPELOU Sold Projects Volume was €50 million

In 2023, KAPELOU plans to achieve €70 million

Kapelou is part of Ukraine's critical Infrastructure

KAPELOU has already implemented over **600 projects** since its foundation.

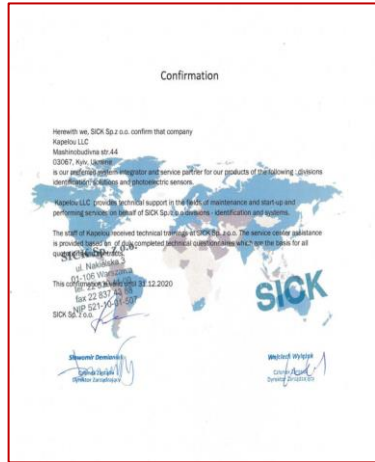

The majority of these projects were realized in the KAPELOU home market Ukraine.

By strategic orientation of KAPELOU the project map is extended more to the west, to Central Europe.

Projects implemented in these countries, among others:

- Bulgaria
 - Germany
 - Greece
 - Holland
 - Poland
 - Sweden
 - Ukraine
 - Hungary
 - Serbia
- and others

KAPELOU R&D PRODUCTS & SYSTEMS

● RoboSort

● Sorting systems

● A-Frame

● Box Shuttle

● Conveyor modules

● Automated storage and issuing of orders

PLATFORMS

▶ MEZZANINE ON THE PLATFORM

▶ PLATFORM 1 LEVEL

▶ PICK TOWER

Maximum efficient use of warehouse space

- The possibility of organizing independent storage areas;
- Effective use of warehouse space;
- Relative ease of installation;
- The possibility of expanding the structure;
- Various modifications of the racking system;
- Ability to use different types of flooring.

Technical characteristics

Available construction height, max	18 m
Load per m ² , max.	100 – 1.500 kg
Number of levels, max.	5
Type of overlap	lattice flooring; fire-resistant and moisture-resistant chipboard; perforated flooring; non-perforated flooring
Element processing is available	enamel powder coating galvanized execution
Available construction height, max.	18 m

SIGMA & SIGMA-PLUS PROFILES:

Profile depth-h: 140 → 450 mm

Thickness – t: 1,25 → 5 mm

CEE & CEE-PLUS PROFILES:

Profile depth-h: 50 → 450 mm

Thickness – t: 1,25 → 5 mm

Types of flooring

For industrial premises

For office premises

ROBOT APPLICATIONS

LEAVE THE PHYSICAL WORK TO THE ROBOTS. INTELLIGENCE BELONGS TO PEOPLE.

Solutions based on robotics allow you to work **24/7** without stops, breaks and sick days. Many times increase the accuracy of operations and the speed of work.

Robots perform physically demanding work and require a minimum of maintenance.

The payback of the project is **less than 12 months**. Calculated on the basis of the current project.

Solutions

1	600 cycles per hour
2	800 cycles per hour
3	800 cycles per hour
4	600 cycles per hour
5	700 cycles per hour
6	700 cycles per hour

 **PLAY VIDEO**

PRODUCTIVITY x8

A feature of the four-tier automatic sorting system is that the carriages move along a curve, around their axis, which increases the reception/issuance of goods in a short period of time.

Performance indicators

Productivity	3,600 pcs per hour
Rotation speed	30 rpm
Filling time	8 s
The overall size of the carriage	330 x 330 mm
Number of carriages	8 pcs
Power	0,45 kW

Speedbot – equipment for quickly moving goods to storage locations

Speedbot efficiently performs the process of sorting parcels according to customer orders or shipping directions.

Works with any type of packaging, accurately and quickly places parcels from the conveyor in the required cells. Easily integrates with the warehouse management system, consumes electricity economically.

 **PLAY VIDEO**

Performance indicators

Productivity	up to 1 000 pcs per hour
Weight of the box	up to 30 kg
Dimensions of the box	400 x 400x 600 mm
The overall size of the carriage	330 x 330 mm
Product type	soft packaging, tablar, plastic and cardboard boxes
Power	0,45 kW

VERTICAL CONVEYOR FOR BOXES

An automated system of placement and picking of goods, which allows you to store goods as densely as possible, quickly and accurately deliver them to warehouse operators.

Parameters

Speed, max.	2 m/s
Load, max.	30 kg
Product dimensions (L x W)	600 x 400 mm
Type of goods	boxes, trays
Length, max.	100 m
Height, max.	12 m
Storage type	one-row, two-row

BOX SHUTTLE

G2P. Increases storage density by 80-400%

KAPELOU's latest development, an autonomous goods handling robot, which we call GNOM, is designed for automatic pick, storage and simultaneous processing of several boxes.

Performance indicators

Movement speed	1 m/s
Carriage movement speed	0,25 m/s
Load	up to 30 kg
Product dimensions (W x H x D)	400x220 (up to 400) x600 mm
Storage range	0,4 – 1,5 m
Platform rotation angle	90°
Number of places for simultaneous movement of goods	3+1

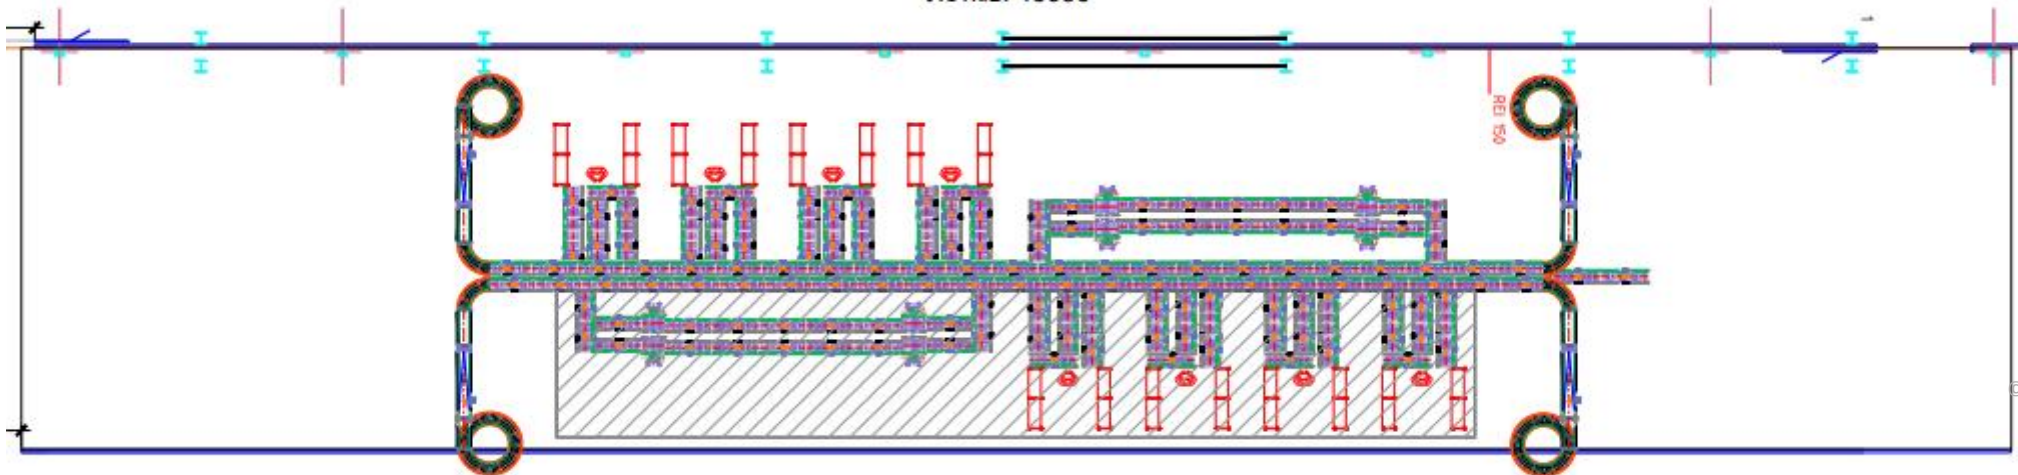

RT.016.00.00.000.

Eliminates the need for extra runs of pickers, increasing the accuracy of picking and reducing labor intensity.

Compared to manual selection, automated solutions **increase efficiency by 2-3 times.**

PRELIMINARY PREPARATION AND SORTING OF THE WAVE

The system solves the problem of peak load of highly dynamic e-commerce warehouses, FMCG, manufactures, distributors.

HIGH PRODUCTIVITY AND ACCURACY

The uniqueness of the order storage system ensures a fully automated process of supplying trays with goods for order picking and eliminates errors in the picking process.

24/7

Works without vacations and lunches, overtime

600 trays/hour

Maximum productivity at 4 tiers

2-16 tiers

The number of tiers for forming order waves

1 time a year

Minimal maintenance

"Goods to people" (G2P)

Waves of orders are sequentially delivered to the sorting workplace

Parameters

Capacity	> 8.000 parcels / hour
Destinations	33
Infeed Conveyor	Seperating Parcels
Volume Scanner	For Transportation Optimization
Weighing Module	For Verification
PreSorting	Start of System
Lifting Belt	Lifts Goods, so that they can easy be diverted out
Outfeeds	8 – Goods are pushed to here for 4 Destinations
Sorting Cages	32 – 4 Cages at each area

Features

- Ideal for high capacities. If ROI permits, it represents the most advantageous system for installation
- Capable of sorting sizes ranging from 50x50x5 mm to 900x700x500 mm
- Versatile enough to handle products of irregular shapes

Process

- Parcels will be infeed into sorting cycle
- The sorting belt runs at a constant speed
- Parcels get pushed out to the right outfeed

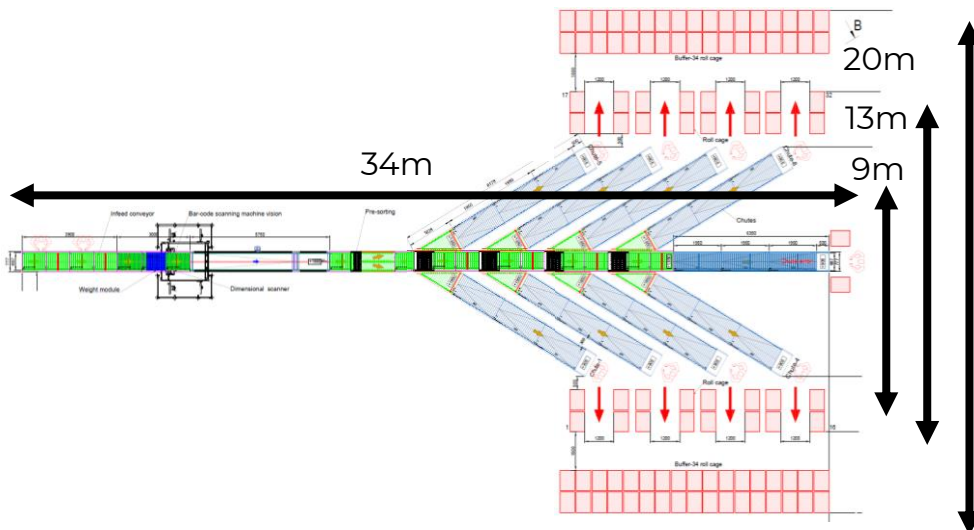

Features

- Conveyor Sorters are robust and cost efficient. The capacity is limited by hall space depending on infeed & outfeed.
- Dimensions 300x200x5 to 800x600xs, shape must be cubic.

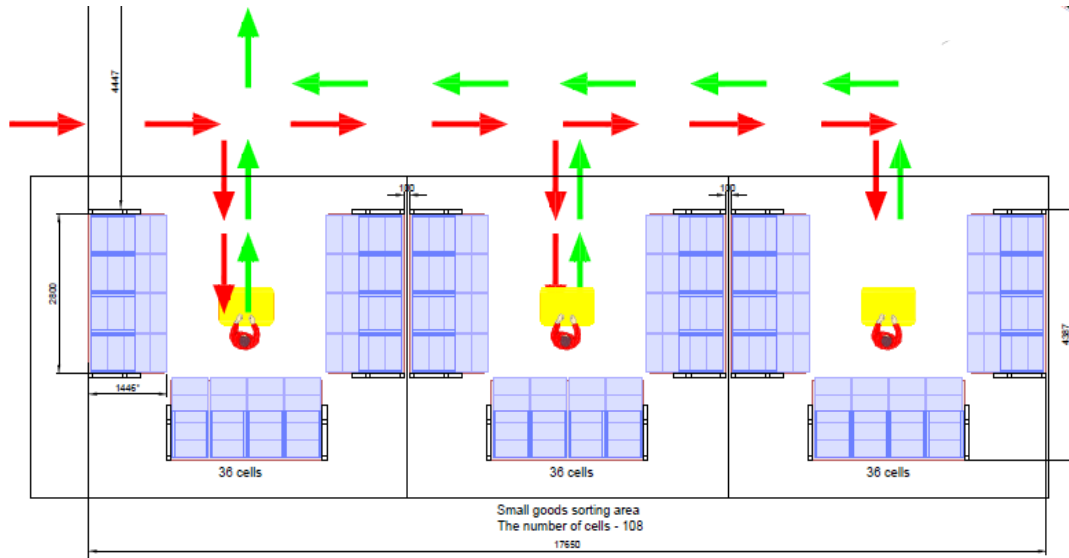

Process

- Parcels put on Infeed
- Premodules scan weight & volume
- Barcode Scanner scans the Parcel
- Diverter System pushes good to right outfeed

Parameters

Capacity	2.000 parcels / hour
Destinations	32
Infeed Conveyor	Seperating Parcels
Volume Scanner	For Transportation Optimization
Weighing Module	For Verification
PreSorting	Start of System
Lifting Belt	Lifts Goods, so that they can easy be diverted out
Outfeeds	8 – Goods are pushed to here for 4 Destinations
Sorting Cages	32 – 4 Cages at each area

PBL Systems are fast Sorting Options and support the manual process. They help reducing errors. Recommended for goods up to 2kg.

Process

- Scan the barcode
- Light appears at the spot where to place the good
- Put good into the right place
- Repeat process with next good

Parameters

Sorting system	Pick by Light / Put to Light
Capacity	Fast (depending on manual speed)
Main benefit	Reducing of failures in manual picking
Handheld scanner	Identification of barcode
Light system	Light flashing to identify storage area
Racking	Flowrack system

PICK TO LIGHT & PUT TO LIGHT SYSTEM

- Video of a client's System for Pharma Solutions
- A put-to-light system, but not a classical one

 [PLAY VIDEO](#)

UnitHub® is a space-saving, automated storage system based on a 3D measuring system and dynamic shelving.

STORING products / orders

DISPENSING orders

SENDING parcels

Application example of the Unithub:

A package is placed in the **Unithub** by a member of staff

The volume of the package is automatically measured in the **Unithub**

The parcel is stored in a corresponding, possibly dynamically adjusted, storage place

The customer receives a notification code on his smartphone for the collection of the parcel

The customer can initiate the collection with the help of the notification code and an app

Unithub delivers the corresponding package to the customer

 **PLAY VIDEO**

Main benefits of UnitHub

- 24/7 service
- Maximum storage capacity through dynamic storage locations
- Fully automated parcel delivery and acceptance
- Scalable system
- Can be used as a cold store
- State-of-the-art warehouse automation to increase customer satisfaction

Parameters

Storage capacity, max.	400 trays
Size of the storage place (WxL)	600x400 mm
Height of the storage place	Dynamic
Measurement of parcel size and weight	Automatically
Parcel weight, max.	30 kg
Location	Indoor / Outdoor
Possible climate control levels	2-8°C / 8-15°C / 15-25°C
Type of goods	Cartons, plastic trays, containers, bottles and more

UnitHub®

Solution for co
storage warehouse

A-Frame is a warehouse picking system, that packs products from vertical channels into boxes, cartons or onto a conveyor belt that moves through the center of the system.

 **PLAY VIDEO**

Parameters

Size of product, min.	45x40x60 mm
Size of product, max.	160x85x190 mm
Picking speed, max.	3.000 products / hour
Output system speed, max.	5 products / second
Product weight in vertical channel, max.	15 kg

24 channels, 12 on each side

CONVENIENCE AND ERGONOMICS

It is intended for the convenient organization of the workplace of an employee who is engaged in picking, sorting, packing and controlling goods. Suitable for working with any goods.

Using the table simplifies the work - you no longer have to lift and carry a heavy product, it is enough to pull it from the conveyor to the auxiliary corner of the table, and then perform the assigned tasks.

Features

- The table top is made of stainless steel and is therefore resistant to scratches, impacts and other mechanical damage
- The wooden pad protects the worker from contact with the cold metal surface
- Well-thought-out protection against cuts - pasted protective tape in places where you can harm yourself
- Modularity and versatility allow you to assemble a table according to the parameters (height) of a specific employee.

Unloading
in both directions

A compact tool for moving boxes, which significantly increases the speed of loading and unloading cargo in the warehouse, eliminates delays and improves work efficiency.

Parameters

Dimension of robot (LxWxH)	600x400x200 mm
Box weight	50 kg
Number of boxes on the carriage	1 pc
Box lift height	6 m
Speed of movement along the horizon	2 m/s
Horizontal acceleration	2 m/s ²
Carriage lifting speed	2 m/s
Carriage acceleration	2 m/s ²
Crane mass	500 kg

GOOD TO PERSON (G2P)

A modern method of moving goods in the warehouse, which speeds up the process of placing and picking goods.

Benefits

- x3 to sorting efficiency
- 99.99% accuracy
- 1-2 years ROI
- A flexible solution
- Run up to 8 weeks

Parameters

Dimension of robot (LxWxH)	480x380x200 mm
Box weight, max.	5 kg
Speed, max.	1,5 m/s

PALLET LIFT

INCREASED EFFICIENCY AND SECURITY:

- The Kapelou modular pallet conveyor is a reliable and durable system designed for the horizontal transport of various types of pallets, including euro pallets, industrial pallets and half pallets.
- The conveyor consists of a strong frame and galvanized rollers $\varnothing 76$ mm, which are easy to maintain. The rollers are driven by a single drive roller, and the drive is closed for safety. The guides are installed separately on rollers, which ensures smooth and accurate transportation of pallets. This system is ideal for businesses looking for a quality and efficient pallet handling solution.

Options

- Model for cold storage (-30C)
- Visualization system (HMI / SCADA)
- End stop
- Application of ZPA

Performance indicators

Transport speed, max.	0,3 m/s
Acceleration	0,3 m/s
Load capacity, max.	1.500 kg
Productivity	Up to 300 units / hour

Basic data

Width (W)	1.050 / 1.250 / 1.450 mm
Length (L)	1.000 – 10.000 mm
Pitch of rollers (P)	175 mm
Transportation height (TH)	Min. 160 mm
Engine Power	0,18 / 0,25 / 0,37 / 0,55 kW

INCREASED EFFICIENCY AND SECURITY:

- The modular pallet conveyor from Kapelou is a strong and reliable system designed for the horizontal transport of various types of pallets, including euro pallets, industrial pallets and half pallets.
- The galvanized conveyor consists of a stable frame and Ø89 mm rollers that are easy to maintain. The rollers are set in motion with the help of a motor-reducer, which ensures efficient and smooth transportation of pallets. This system can operate in the mode of a pass-through conveyor or in the mode of an accumulation conveyor, when only those areas that transport pallets are active at any time. This feature increases performance and reduces power consumption.

Options

- Model for cold storage (-30C)
- Visualization system (HMI / SCADA)
- End stop
- Application of ZPA

Performance indicators

Transport speed, max.	0,3 m/s
Acceleration	0,3 m/s
Load capacity, max.	1.500 kg
Productivity	Up to 900 units / hour

Basic data

Width (W)	1.050 / 1.250 / 1.450 mm
Length (L)	1.000 – 10.000 mm
Pitch of rollers (P)	200 mm
Transportation height (TH)	Min. 160 mm
Engine Power	0,18 / 0,25 / 0,37 / 0,55 kW

The drive direct chain conveyor is designed for automatic transport of pallets on the wide side. It consists of 2 integrated parallel chains connected by a motor-reducer.

Lifting devices:

- Roller conveyor
- Chain conveyor
- Lifting table
- Turntable

Options:

- Model for cold storage (-30C)
- Visualization system (HMI / SCADA)

Performance indicators

Productivity	60 units/hour
Transportation speed, max.	0,3 m/s
Load capacity, max.	1.500 kg
Engine power	0,18 – 0,55 kW

Basic data

Width (W)	760 mm
Length (L)	1.475 mm
Height (H)	145 mm
Transportation height (TH)	Min. 400 mm

This module is used to load or unload the conveyor with pallets. For example, pallets can be placed on a conveyor or removed from it using a forklift.

It is appropriate to use the module in such cases :

1. If pallets are unloaded from trucks in the shipping area of the warehouse and need to be placed on a conveyor
2. When pallets need to be quickly removed in the final part of the conveyor system of the system for further loading.
