

WAREHOUSE PLATFORMS AND MEZZANINES, RACKING SYSTEMS

Market transformation into single order picking and scarcity of space forces the business to move in the direction of vertical logistics.

Optimization of warehouses and the creation of an organized system for storing goods in a warehouse will increase its speed, reduce labor costs and, as a result, ensure the optimal life of goods in the warehouse.

We work with a German storage system manufacturer - **META** and leading European manufacturer of mezzanine floors and cold rolled steel profiles - **PROFIELNORM**.
