SORTING SYSTEMS

The automatic sorting system will speed up processing of a wide range of goods and parcels of different sizes, shapes and weights.

The conveyor system minimises human involvement in the sorting process, speeds up the sorting process and prevents errors.

SORTING SYSTEMS TECHNICAL DATA

2 m/s

0,1~35 kg

150*200 mm
600*800 mm

up to 15,000 trays/h

- drive technology with low energy consumption
- low noise level – less than 70 dB
- fast disassembly and maintenance process due to modularity of construction
